

iPass

Unlocking the Future of Access Control

In a world where security is paramount, iPass stands at the forefront of technological innovation, offering state-of-the-art security solutions for physical access control. Our range of multi-technology access readers, cryptographic access cards, and smartphone credentials are designed to integrate seamlessly with your existing access control system, providing enhanced security

Revolutionary Readers

iPass Multi-Technology Access Readers

Experience the future of access control with iPass Multi-Technology Access Readers. Our advanced access readers support all access control systems and cards, offering flexibility plus high security. With support for Bluetooth smartphone and NFC smart card authentication, and connectivity via Wiegand and OSDP Secure Channel, our readers ensure that only authorized personnel can access your facilities. Stylish ergonomic design, in multiple form factors and capabilities, makes them a perfect fit for all access requirement.

Unbreakable Security

iPass Cryptographic Access Cards

Elevate your security level with iPass Cryptographic Access Cards. Utilizing high-strength public key cryptography, our access cards provide unbreakable credentials that significantly enhance the security of any access solution. A public key that can be exposed without risk and a private key that never leaves the card eliminate the risk of duplication or forgery, plus our uniquely simple “no PKI” design, makes them the perfect choice to enhance any access control system.

Mobile Secured

iPass Secure Mobile Credentials

Transform any Bluetooth smartphone or smartwatch into a secure access credential with iPass Mobile Credentials. Our intuitive iPass App, available for both iOS and Android, allows for quick and easy enrollment and credential generation. With support for multi-factor authentication, including PIN codes, facial recognition, and fingerprint matching, our mobile credentials offers flexible security levels to meet the most stringent security requirements.

Seamless Integration

All iPass products are designed for easy integration with your existing access control system. Our readers and cards are compatible with all access solutions and authentication technologies, and can be quickly configured to meet your specific needs. Whether upgrading an older access system or implementing a new one, iPass provides a smooth transition to higher security.

Join the Revolution

Upgrade to iPass and experience a new standard in access control technology. Our products are not just solutions; they are investments in the safety and integrity of your facilities. Reach out to our sales team to learn how iPass can seamlessly enhance your organization's physical security, or visit our website to explore our state-of-the-art security products and solutions.
